## 01 //REMOTE MONITORING

Remote Monitoring Services can help optimize your operations, improve employee efficiency and increase productivity.

## 02 //MANAGED SECURITY

SMBs are often at greater risk of cybercrime due to security compromises made from a lack of resources. With best practices we can help in reducing attacks and minimizing security risks.

## 03 //CLOUD

Moving to cloud may reduce the cost of managing and maintaining your IT resources. Utilize the resources available on cloud rather than purchasing and maintaining your own.

## 04 //24X7 HELP DESK

No matter how complex the technology becomes, our people at Service Desk are available 24X7 for support.

# TOP 5 BENEFITS

1. Experience complete control over your business technology without having to actually manage an IT department. This gives you the time you need to focus on your business functions.
2. Decrease technology risks. With managed IT, your company doesn't have to worry about repairing, implementing, or replacing technology solutions. Your organization also avoids the hassle of losing and trying to replace trained IT personnel.
3. Reduce Downtime and Enjoy access to secured and up-to-date technology solutions without having to invest in expensive equipment.
4. Reduce stress and improve efficiency of your team. Allow your staff to focus on tasks that are productive for the business.
5. Gain the expertise of a specialist, without having to spend time and financial resources training staff to become experts.

# BUSINESS CONTINUITY

According to IBM in 2011, of the companies that had a major loss of business data, 43 percent never reopen, 51 percent close within two years and 6 percent will survive long-term. With often described as 'just common sense' Business Continuity is about taking responsibility for your business and enabling it to stay on course whatever storms it is forced to weather. It is about "keeping calm and carrying on"!

With ILC's Business Continuity plan your business is ensured to run and operate even in the most critical situation. Its not just about the Backup and Recovery, we also ensure that even in a case of disaster your Business can be brought back to track with least or no downtime.
